

# FL1F IDEC SmartRelay

New IDEC SmartRelay FL1F enhances both high performance and easy control.

- Maximum I/O 60 points: (24DI + 20DO + 8AI + 8AO)
- Maximum programming capacity: 8,500 bytes (400 function blocks)
- For Base Modules with LCD display, not only program editing and monitoring of function blocks, but also addition and deletion of programs can be performed.
- The newly-developed user interface enables intuitive operation. Programs can be modified quickly.
- For Base Modules with LCD display, a backlight display with 3 colors (white, amber, red), which can display 16 characters x 6 lines, is available (2-byte characters also available).
- Data is stored in a non-volatile memory, which provides no limit in backup time.
- With a built-in clock function, a maximum of 20-day backup is possible (at ambient temperature of 25°C.)
- Equipped with a micro SD memory card slot, program downloading and data logging is possible using a commercially-available memory card.
- Ethernet communication port (RJ45). No cables required for downloading and uploading user programs.
- Web server function monitors the monitoring status of the FL1F on-site from PCs and smart devices.
- With 1:n communication, a system with a maximum of 16 connections can be built.
- The Text Display for FL1F is a backlight LCD display (160 x 96 dots) available in 3 colors (white, amber, and red). Display of up to 20 characters x 6 lines. Scrolling, blinking, and bar graph available.
- Five new function blocks available (astronomical clock, analog filter, maximum and minimum, average, stop watch).

## FL1F

### Base Modules

							Package Quantity: 1
Rated Power Voltage	Input Signal	Output Signal	Display	Clock	I/O Points	Weight (approx.)	Part No.
24V DC	DC	Transistor	Yes	Yes	8/4 points	195g	FL1F-H12SCD
12/24V DC	I1, I2, I7 and I8 are used for digital/analog inputs	Relay	Yes	Yes	8/4 points	240g	FL1F-H12RCE
24V AC/DC	AC/DC <sup>1</sup>	Relay	—	Yes	8/4 points	200g	FL1F-B12RCE
100 to 240V AC/DC	AC/DC	Relay	Yes	Yes	8/4 points	240g	FL1F-H12RCA
			—	—	8/4 points	200g	FL1F-B12RCA
			Yes	Yes	8/4 points	240g	FL1F-H12RCC
			—	—	8/4 points	200g	FL1F-B12RCC

<sup>1</sup>: With NPN/PNP sensor input. For details, see "Input Internal Circuits" on page 5.

### Expansion I/O Modules

					Package Quantity: 1
Input/Output	Type	Rated Power Voltage	Input Signal	Output Signal	I/O Points
	24V DC	DC	Transistor	4/4 points	95g
	12/24VDC	DC	Relay	4/4 points	130g
	24V AC/DC <sup>2</sup>	AC/DC <sup>2</sup>	Relay	4/4 points	130g
Analog Input	100 to 240V AC/DC	AC/DC	Relay	4/4 points	130g
Analog Output	12/24V DC	Analog	—	2/0 points	95g
	24V DC	—	Analog	0/2 points	95g

<sup>2</sup>: With NPN/PNP sensor input. For details, see "Input Internal Circuits" on page 5.

- I/O points within the maximum number of expandable I/O points can be used.
- When using modules of the same power voltage, supply power to the Base Module and Expansion I/O Modules using one power supply. When power is supplied to the modules from different power supplies, the fast transient burst is 1 kV (IEC61000-4-4).

### Text Display for FL1F

			Package Quantity: 1
Rated Power Voltage	Weight (approx.)	Part No.	Remarks
24V AC/DC 12V DC	220g	FL1F-RD1	Supplied with a mounting clip and gasket

### Options

Name	Part No.	Ordering No.	Package Quantity	Remarks
Application Software: WindLGC	FL9Y-LP1CDW	FL9Y-LP1CDW	1	DVD-ROM (incl. online help manual)
Mounting Clip for Base Module	FL1F-PSP1	FL1F-PSP1PN05	5	Supplied with a module <sup>3</sup>
Mounting Clip and Waterproof Gasket for Text Display	FL1F-KW1	FL1F-KW1	1	Supplied with Text Display <sup>4</sup>
IDECA SmartRelay User's Manual (English)	FL9Y-B1789	FL9Y-B1789	1	Downloadable from: <a href="http://www.idec.com/download">http://www.idec.com/download</a>

<sup>3</sup>: Supplied with a Base Module and an Expansion I/O Module.

<sup>4</sup>: Supplied with a Text Display, it includes a gasket, four mounting clips, and a power supply connector.

\*1: When selecting frequency trigger function.

\*2: 10m when connected to analog input (twisted pair cable)

Initialization Time: After power-up, the FL1F takes a maximum of 1.2 seconds (when using a micro SD card) for initialization. When initialization is complete, the FL1F is automatically set to RUN mode.

## Expansion I/O Module Specifications

## General Specifications

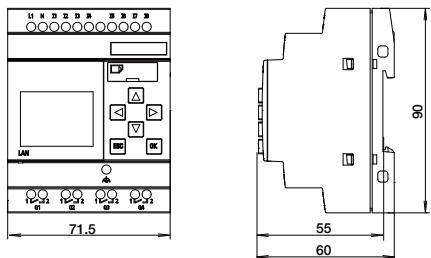

Item	Specifications	Standard
Operating Temperature	0 to 55°C (no freezing)	Cold: IEC60068-2-1 Hot: IEC60068-2-2
Vertical Mounting	0 to 55°C (no freezing)	
Storage/Transportation Temperature	-40 to +70°C (no freezing)	—
Relative Humidity	10 to 95% (no condensation)	IEC60068-2-30
Atmospheric Pressure	795 to 1080 hPa	—
Operating Condition	No corrosive gas	—
Degree of Protection	IP20	—
Vibration Resistance	5 to 8.4 Hz, amplitude 3.5 mm 8.4 to 150 Hz, acceleration 9.8 m/s <sup>2</sup>	IEC60068-2-6
Shock Resistance	147 m/s <sup>2</sup>	IEC60068-2-27
Drop Test (packaged)	0.3m	IEC60068-2-32
Emissions	Limit class B Group 1 Conducted: 0.15 tp 30MHz	EN55011/A EN55022/B EN50081-1
Electrostatic Discharge Immunity	8 kV air discharge 6 kV contact discharge	IEC61000-4-2
Radiation Field Immunity	Field Strength: 1 V/m and 10 V/m	IEC61000-4-3
Fast Transient Burst	2 kV (power line) 2 kV (I/O signal line)	IEC61000-4-4
Surge Immunity*1 (FL1F-H12RCC, FL1F-B12RCC only)	1 kV (power line) normal 2 kV (power line) common	IEC61000-4-5
Communication Cable	2.5 mm <sup>2</sup> (one wire) 1.5 mm <sup>2</sup> (two wires)	—
Terminal Style	Finger-safe type*2	—

\*1: For protection against surge noise on DC power supply types (FL1F-H12RCE/B12RCE, FL1F-H12SCD, FL1F-H12RCA/B12RCA), use surge absorbers, noise cut transformers, or noise filters. Use of a surge protection device (DEHN + SÖHNE GmbH + Co, BVT AD 24 Part No. 918 402) is recommended.

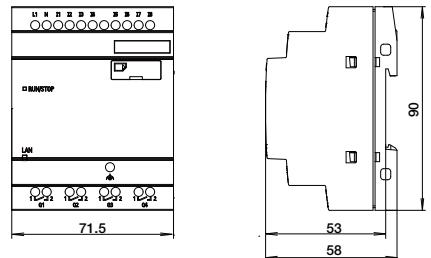

\*2: Tightening torque 0.5 to 0.6 N·m

## Dimensions

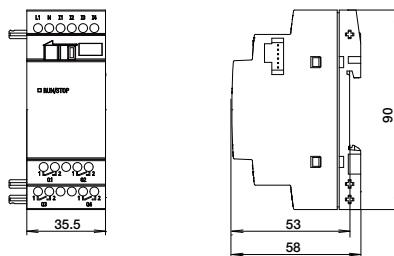

### Base Module (with Display)

### Base Module (without Display)

### Expansion I/O Module

## Text Display Specifications

### Specifications

Dimensions (W × H × D)	128.2 × 86 × 38.7 mm
Weight (approx.)	220g
Installation	Panel cut-out using mounting clips
Keyboard	Membrane keypad
Display	FSTN graphic display (W × H: 160 × 96 dots) LED backlight (White, Amber, Red)
Font type	English, Spanish, Russian, Chinese, Italian, Turkish, German, Dutch, French, Japanese
Displayable string	1 screen 6 lines × 20 columns

### Power Supply

Power Voltage	24V AC/DC 12V DC
Allowable Voltage Range	20.4 to 26.4V AC 10.2 to 28.8V DC
Allowable Voltage Frequency	47 to 63Hz
Power Consumption	12V DC: 145 mA (Typ.) 24V DC: 70 mA (Typ.) 24V AC: 75 mA (Typ.)
Data Transmission Rate	10/100 M full/half duplex data transmission rate

### LCD Display / Backlight

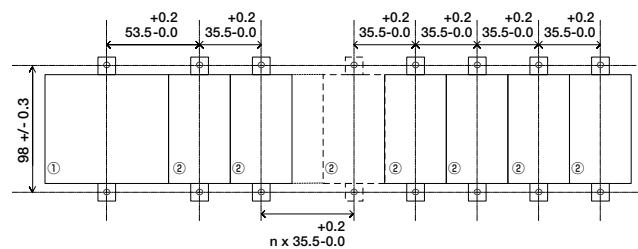

LCD Display Durability*3	50,000 hours
Backlight Durability*4	20,000 hours

\*3: Display durability is calculated under ordinary operating and storage conditions: room temperature, normal humidity below 65% RH, and not subjected to direct sunlight.

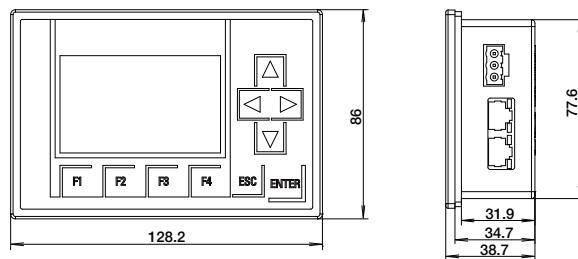

\*4: Backlight durability is the number of hours taken for the light to become 50% of the original brightness.

All dimensions in mm.

### (Panel Cutout)

## Input Internal Circuits

### DC Input

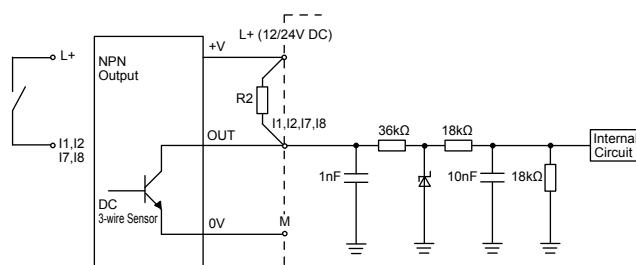

FL1F-H12SCD/-H12RCE /-B12RCE  
FL1F-M08B1S2/-M08B2R2

When using a NPN output sensor, connect an external resistor (I3 to I6):  
FL1F-H12SCD:

For power voltage 24V DC:  $R1 \leq 4k\Omega$ , 1/4W  
FL1F-H12RCE, -B12RCE

For power voltage 24V DC:  $R1 \leq 8.1k\Omega$ , 1/4W  
For power voltage 12V DC:  $R1 \leq 1.5 k\Omega$ , 1/4W

I1, I2, I7 and I8 accept both digital and analog inputs.

The diagram above is for using I1, I2, I7, and I8 as digital inputs.

When using a NPN output sensor, connect an external resistor (I1, I2, I7, I8):  
FL1F-H12SCD:

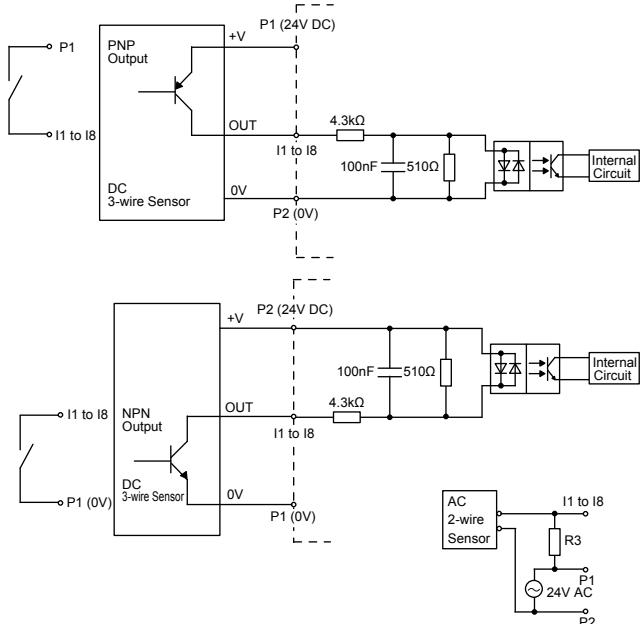

For power voltage 24V DC:  $R2 \leq 50k\Omega$ , 1/8W  
FL1F-H12RCE, -B12RCE

For power voltage 24V DC:  $R2 \leq 100k\Omega$ , 1/8W

For power voltage 12V DC:  $R2 \leq 19k\Omega$ , 1/8W

### 24V AC/DC Input

FL1F-H12RCA /-B12RCA  
FL1F-M08D2R2

Bleeder resistance (R3) calculation  
R3 must satisfy the following three conditions.

$$\text{Condition 1: } R3 (\Omega) \leq \frac{\text{Maximum input OFF voltage} (= 5VAC)}{\text{Maximum sensor leakage current (A)}}$$

$$\text{Condition 2: } R3 (\Omega) \leq \frac{\text{Sensor power voltage (V)}}{\text{Maximum sensor load current (A)}}$$

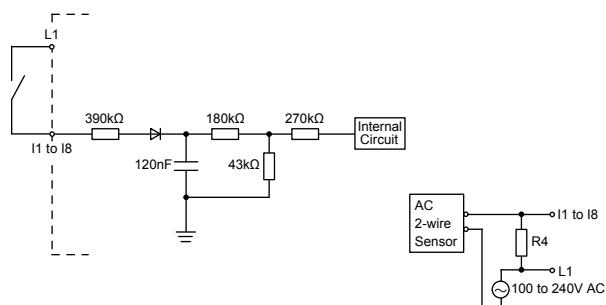

The voltage drop across the load (R3) must be less than 5V while the sensor is turned off.

$$\text{Condition 3: } P_{R3} (W) \leq \frac{(\text{Sensor power voltage (V)})^2}{R3 \text{ resistance} (\Omega)} \times 3 \text{ (3: recommended allowance)}$$

### 100 to 240V AC/DC

FL1F-H12RCC /-B12RCC

FL1F-M08C2R2

FL1F-H12RCC/-B12RCC:  $R7=180k\Omega$ ,  $R8=47k\Omega$

FL1F-M08C2R2:  $R7=390k\Omega$ ,  $R8=62k\Omega$

Bleeder resistance (R4) calculation

R4 must satisfy the following three conditions.

$$\text{Condition 1: } R4 (\Omega) \leq \frac{\text{Maximum input OFF voltage} (= 40VAC)}{\text{Maximum sensor leakage current (A)}}$$

$$\text{Condition 2: } R4 (\Omega) \leq \frac{\text{Sensor power voltage (V)}}{\text{Maximum sensor load current (A)}}$$

The voltage drop across the load (R4) must be less than 40V while the sensor is turned off.

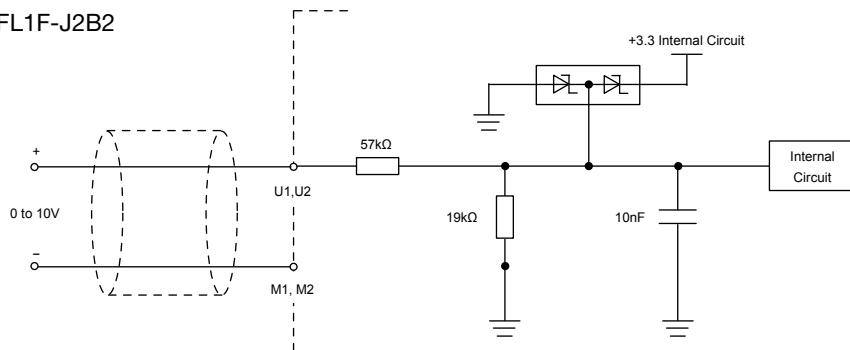

$$\text{Condition 3: } P_{R4} (W) \leq \frac{(\text{Sensor power voltage (V)})^2}{R4 \text{ resistance} (\Omega)} \times 3 \text{ (3: recommended allowance)}$$

# FL1F IDEC Smart Relay

## Analog Voltage Input

FL1F-H12SCD/-H12RCE / -B12RCE

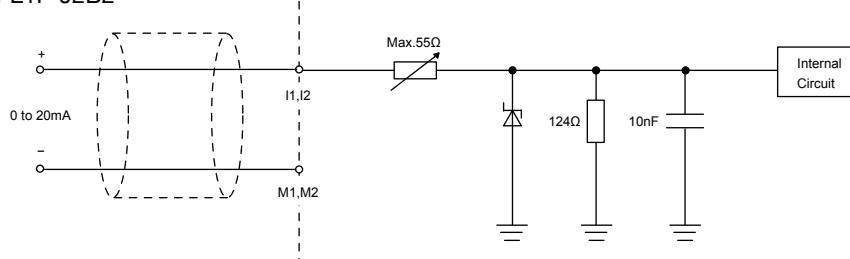

FL1F-J2B2

I1,I2,I7 and I8 accept both digital and analog inputs. When connecting an analog input, use a twisted pair cable, and keep the cable as short as possible.

## Analog Current Input

FL1F-J2B2

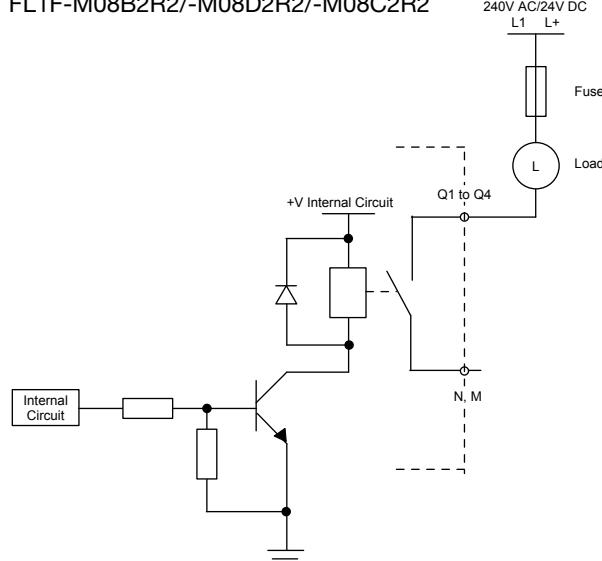

## Output Internal Circuits

### Relay Output

FL1F-H12RCE/-B12RCE/-H12RCA/-B12RCA/-H12RCC/-B12RCC

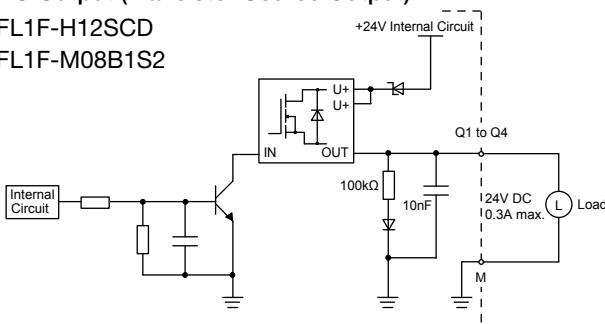

FL1F-M08B2R2/-M08D2R2/-M08C2R2

### DC Output (Transistor Source Output)

FL1F-H12SCD

FL1F-M08B1S2

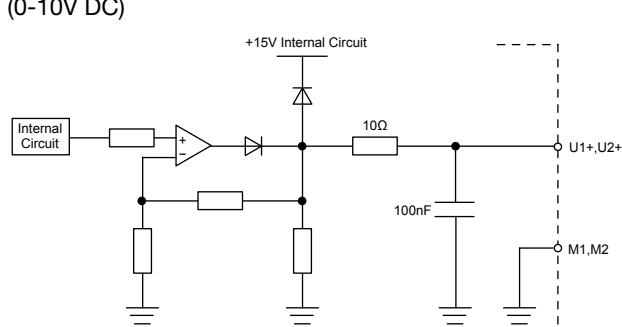

When connecting to a DC input type PLC, use a negative common sink input type.

### Analog Voltage Output

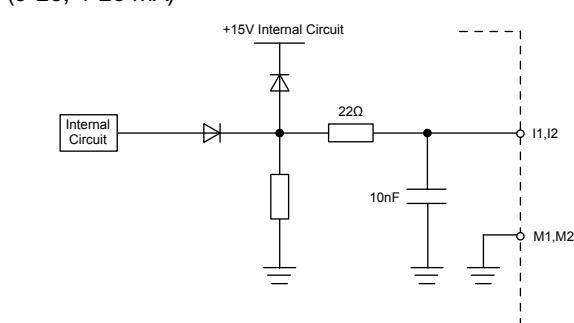

FL1F-K2BM2

(0-10V DC)

### Analog Current Output

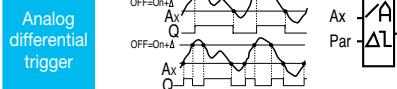

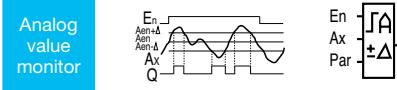

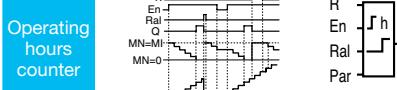

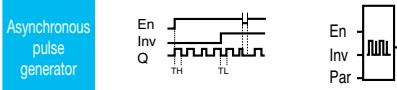

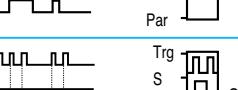

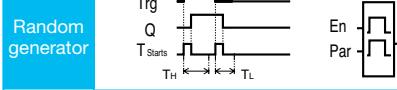

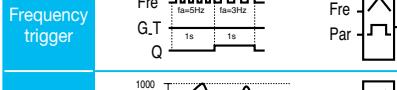

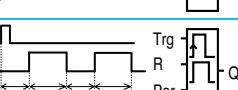

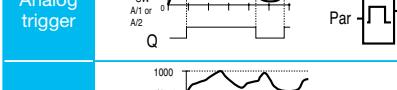

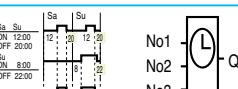

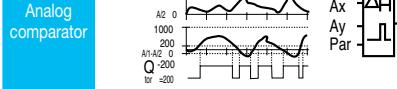

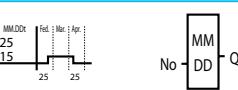

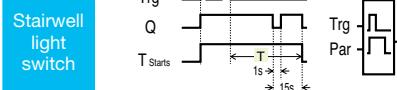

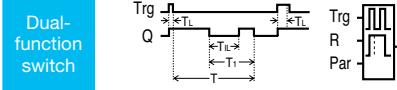

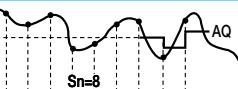

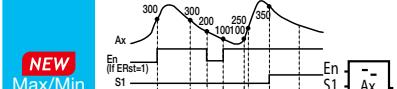

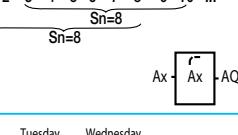

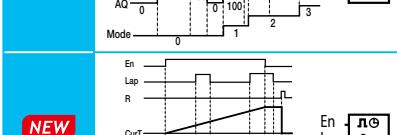

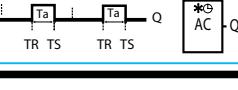

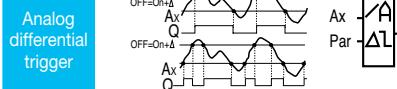

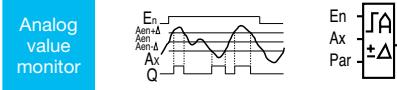

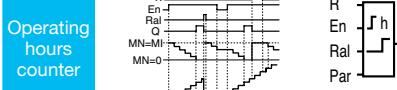

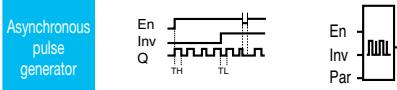

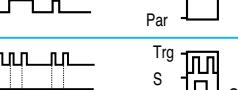

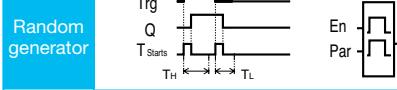

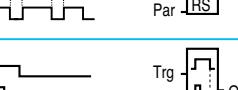

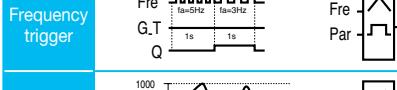

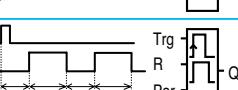

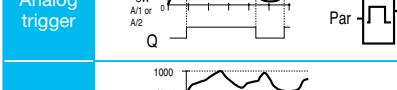

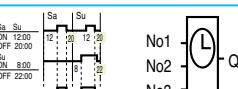

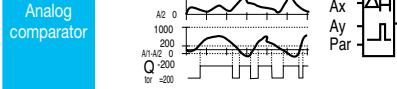

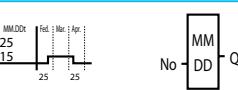

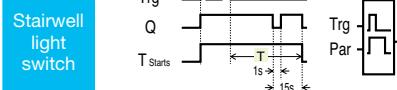

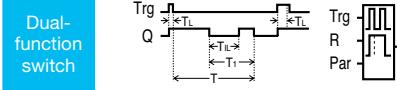

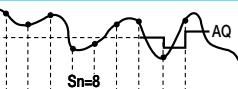

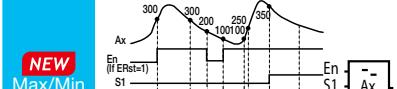

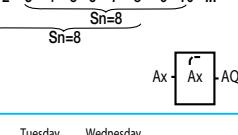

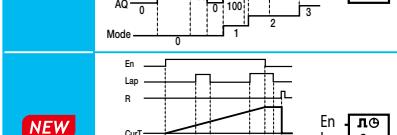

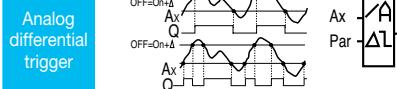

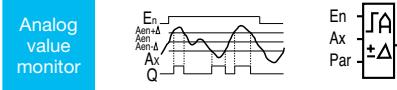

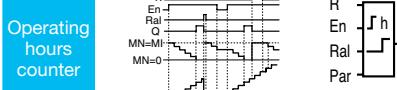

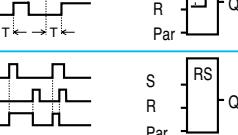

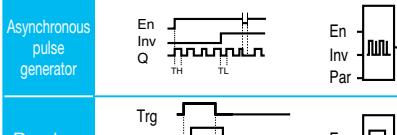

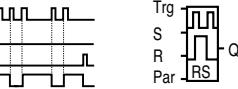

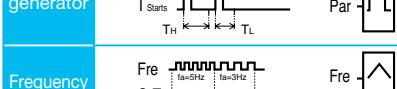

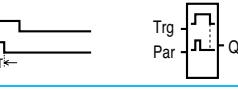

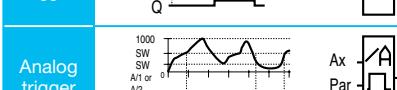

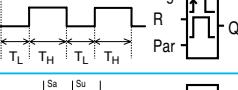

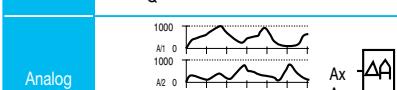

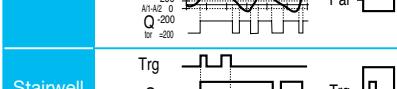

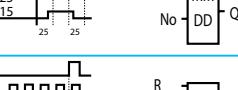

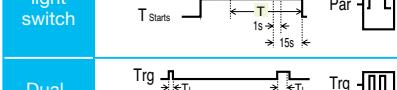

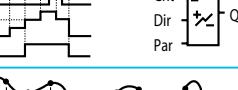

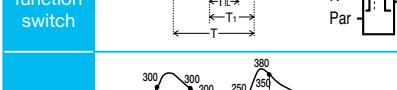

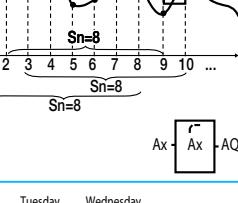

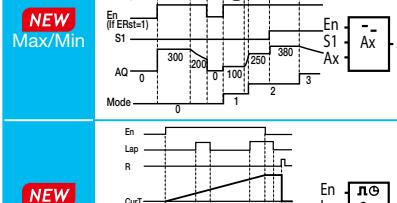

(0-20, 4-20 mA)

## General Function Blocks

<b>AND</b>	Series connection of normally open contacts 
<b>AND (Edge)</b>	Edge detection with edge evaluation (pos. edge) 
<b>NAND</b>	Parallel connection of normally closed contacts 
<b>NAND (Edge)</b>	Edge detection with edge evaluation (pos. edge) 
<b>OR</b>	Parallel connection of normally open contacts 
<b>NOR</b>	Series connection of normally closed contacts 
<b>XOR</b>	Double changeover contact 
<b>NOT</b>	Connection of closed contact 

## Special Function Blocks

<b>On-delay</b>	 Trg → Q	 Trg → Par → Q

## Instructions

### Module Expansion

Use the Base Module and Expansion I/O Modules up to 60 I/Os according to the combinations shown below.

1. For the terminal arrangement and wiring of the module, please be sure to read FL1F user's manual.
2. Before connecting and disconnecting modules, turn power off.
3. A maximum of 24 digital inputs, 8 analog inputs, 20 digital outputs, 8 analog outputs can be used by using a combination of a Base Module and Expansion I/O Modules.
4. When using modules of the same power voltage, supply power to the Base Module and Expansion I/O Modules using one power supply. When supplying power to the modules using different power supplies, supply power to the Base Module and Expansion I/O Module at the same time. Or, supply power to the Expansion I/O Module before the Base Module. Expansion I/O module may not be recognized if power is supplied to the Expansion I/O Module after the Base Module. When power is supplied to the modules from different power supplies, the fast transient burst is 1 kV (IEC61000-4-4).
5. A 100 to 240V AC/DC module cannot be connected to the right side of a 12/24V DC, 24V DC, or 24V AC/DC module.
6. For optimal and high-speed communication performance between Base Module and Expansion I/O Modules, install the input/output modules first, then the analog modules.
7. FL1F is pending for approval by the following marine standards (as of September 2015).
  - ABS: American Bureau of Shipping (USA)
  - BV: Bureau Veritas (France)
  - DNV: Det Norske Veritas (Norway)
  - GL: Germanischer Lloyd (Germany)
  - LRS: Lloyds Register of Shipping (UK)
  - Class NK: (NIPPON KAIJI KYOKAI)
8. The following are the conditions of marine standards approval.
  - Modules of rated power voltage 12/24V AC/DC: Use at 24V DC
  - Modules of 12/24V DC and 24V DC: Use a surge protection device Part no. 918 402/918 422 made by DEHN+SÖHNE or equivalent.
  - For applications on a bridge or decks, a noise filter Part no. B84113-C-B-30 (made by TDKEPCOS) or equivalent is used (FL1F-RD1 cannot be used on a bridge or deck).
  - Contact IDEC for the environment where FL1F can be used.

### Wiring

#### Base Module and Expansion I/O Module

- Connect an IEC60127 approved fuse to the power supply for protection against overload and short circuit.
- Do not connect input wire and communication cable in parallel or near the power line, output line, or motor line. Also make sure that any noise source is not present nearby.

### Initialization after Power-up

- Initialization starts when the FL1F Base Module is powered up. When initialization is complete, the FL1F is automatically set to RUN mode. When using the FL1F Base Module with display, a timer appears on the display during the initialization. When using the FL1F without display, the red LED flashes during the initialization, then the green LED flashes after the initialization.
- Initialization time  
1.2 seconds maximum

Specifications and other descriptions in this brochure are subject to change without notice.
